RE: Upper Deschutes Resource Management Draft

As a concerned citizen and recreationist I would like to be on record as supportive of motorized recreation on BLM lands in Central Oregon.

The preferred alternative BLM is proposing does not adequately reflect how an interim policy will be implemented. This interim policy greatly affects our sport and the users as there are no assurances BLM will ever have the resources to put together a designated trail system in the areas proposed.

The aggressive vegetation management in Alt. 7 of the Juniper woodlands will negatively impact a proposed trail system.

We do not support the closure of the Badlands and feel that providing no motorized opportunities at Prineville Reservoir and the Lapine area is a mistake. There is use occurring in those areas currently, where will that use go? Especially for the Lapine and Prineville residents.

Our use is increasing approximately 20% annually with sales of OHV equipment listed at \$18 billion annually – the increasing use is not reflected in the severe limitations to OHV use on BLM land.

Please adopt a more flexible road trail density to allow for the best use of the land and for a designated trail system that will succeed. By micromanaging your areas and attempting to put trails out for several different uses in the same areas we feel the management will fail and ultimately our use will suffer further restrictions.

RE: Upper Deschutes Resource Management Draft

As a concerned citizen and recreationist I would like to be on record as supportive of motorized recreation on BLM lands in Central Oregon.

The preferred alternative BLM is proposing does not adequately reflect how an interim policy will be implemented. This interim policy greatly affects our sport and the users as there are no assurances BLM will ever have the resources to put together a designated trail system in the areas proposed.

The aggressive vegetation management in Alt. 7 of the Juniper woodlands will negatively impact a proposed trail system.

We do not support the closure of the Badlands and feel that providing no motorized opportunities at Prineville Reservoir and the Lapine area is a mistake. There is use occurring in those areas currently, where will that use go? Especially for the Lapine and Prineville residents.

Our use is increasing approximately 20% annually with sales of OHV equipment listed at \$18 billion annually – the increasing use is not reflected in the severe limitations to OHV use on BLM land.

Please adopt a more flexible road trail density to allow for the best use of the land and for a designated trail system that will succeed. By micromanaging your areas and attempting to put trails out for several different uses in the same areas we feel the management will fail and ultimately our use will suffer further restrictions.

The aggressive vegetation management in Alt. 7 of the Juniper woodlands will negatively impact a proposed trail system.

We do not support the closure of the Badlands and feel that providing no motorized opportunities at Prineville Reservoir and the Lapine area is a mistake. There is use occurring in those areas currently, where will that use go? Especially for the Lapine and Prineville residents.

Our use is increasing approximately 20% annually with sales of OHV equipment listed at \$18 billion annually – the increasing use is not reflected in the severe limitations to OHV use on BLM land.

Please adopt a more flexible road trail density to allow for the best use of the land and for a designated trail system that will succeed. By micromanaging your areas and attempting to put trails out for several different uses in the same areas we feel the management will fail and ultimately our use will suffer further restrictions.

RE: Upper Deschutes Resource Management Draft

As a concerned citizen and recreationist I would like to be on record as supportive of motorized recreation on BLM lands in Central Oregon.

The preferred alternative BLM is proposing does not adequately reflect how an interim policy will be implemented. This interim policy greatly affects our sport and the users as there are no assurances BLM will ever have the resources to put together a designated trail system in the areas proposed.
